

WALK THROUGH METAL DETECTOR

SECURING YOUR LIFE

Model: TB-WTD018

Product Image Dimensions

- Dimensions: (mm)2200(H)x840(W)x600(D)
- Weight: < 75 Kg
- Operating Conditions: -20 °C to +55°C, Humidity 95% or less (non-condensing)
- Material: PVC shell, which is beautiful, generous, fireproof, anti-corrosion, moisture-proof and anticollision, no deformation.
- Safety protection: meet international safety standards, harmless to cardiac pacemaker wearers, pregnant women, magnetic media, etc.

Specifications

- Detection accuracy: 1 coin-sized metal can be detected in the middle of the highest sensitivity; no miss and false alarms.
- Location display: The product is divided into 18 defense areas, and suspicious objects can be accurately displayed in each area.
- Frequency setting: Various frequencies can be adjusted to reduce the interference of parallel use of multiple doors.
- Alarm threshold adjustment: According to the size of the metal to be detected, the alarm threshold can be adjusted, supporting level 255.
- People counting: Bilateral infrared radiation can accurately detect the number of people passing through and people in alarm.
- Positioning LED: Doorpost with LED lights, which can intuitively display the area where prohibited items are located through the positioning lights.
- Panel display: 7-inch LCD screen display.
- One-key setting: Built-in smart chip, which stores the recommended detection sensitivity settings for various locations and it's convenient for users to quickly select.
- Networking function: It can be networked on a single machine, and parameters can be configured through the web terminal
- Power: 25W max
- Protection level: IP41
